

Beauty that lasts.

Western Red Cedar adds natural beauty to your deck projects, and can be enhanced with stains or paint to last for years. West Bay cedar decking is available either green or kiln-dried,

FEATURES

Western Red Cedar is an ideal decking solution. It's natural resistance to insects and decay, temperature, and weather conditions allow it to thrive in any climate. Plus, it's easy to stain and finish, so it will look great too.

One of Cedar's biggest strengths is its ability to take a beating - it's durable. It holds up to the elements, resisting warping and twisting, while maintaining the stability and beauty you want in a deck.
