

Where innovation meets tradition.

West Bay NextGen Cedar has all of the beauty of solid cedar, without all the inconsistencies.

BENEFITS

Nearly any solid cedar item can be made into a NextGen product. This allows us to provide high-end products in preferred lengths while maintaining a beautiful, consistent, look.

As a 100% North American made product, NextGen Cedar is produced from renewable and sustainable fibre supplies, allowing it to be an environmentally friendly option for any project.

Every NextGen product is manufactured to last, and include a 15 year warranty against delamination.
