

## Durability for your project.

West Bay Tongue & Groove (T&G) products are crafted from high-quality, Western Red Cedar, which is known for its superior beauty and durability. This tight-knot fibre is carefully selected to meet our quality standards and is milled and processed to create beautiful pattern stock items.

## FEATURES

Our Cedar T&G is a versatile product that can be used in various applications, including vertical, horizontal, or even diagonal siding, with rough or smooth faces.

Cedar T&G siding provides excellent weather protection due to its coverage upon installation and natural resistance to the elements, and can be produced in clear or knotty grades, depending on the desired aesthetic.
